

Claim Number 1

A turntable for the storage of items, comprising:

A shelf suitable for holding a plurality of items thereon, said shelf further  
including a rim portion generally disposed circumferentially thereon;

5 A supporting means for rotatably supporting said shelf in an application;  
and,

Wherein said shelf and rim portion are comprised of laminated wood.

**Claim Number 2**

The turntable of Claim Number 1, wherein said rim portion is pre-formed from laminated wood and is mountable onto said shelf.

**Claim Number 3**

The turntable of Claim Number 1, wherein said rim portion is formed from pre-formed segments of laminated wood which segments are mountable onto said shelf.

**Claim Number 4**

The turntable of Claim Number 3, wherein said segments are compatibly sized to be efficiently packaged for shipment and for storage.

**Claim Number 5**

The turntable of Claim Number 3, wherein said segments are mountable to the shelf using a number of dowels that fit into aligned holes on the shelf and the rim portion and which fasten the rim portion to the shelf.

**Claim Number 6**

The turntable of Claim Number 1, wherein said shelf has a kidney shape and where said rim portion circumferentially conforms to the kidney shape.

**Claim Number 7**

The turntable of Claim Number 3, wherein said rim portion is mountable to the shelf using screw fasteners.

**Claim Number 8**

The turntable of Claim Number 3, wherein said rim portion is mountable to the shelf using glue.

**Claim Number 9**

The turntable of Claim Number 8, wherein said rim portion is mountable in side-joint fashion to the shelf.

**Claim Number 10**

A turntable for the storage of items, comprising:

A shelf suitable for holding a plurality of items thereon, said shelf further including a rim portion generally disposed circumferentially thereon;

5 A supporting means for rotatably supporting said shelf in an application; and,

Wherein said rim portion is comprised of laminated wood.

**Claim Number 11**

The turntable of Claim Number 10, wherein said rim portion is pre-formed from laminated wood and is mountable onto said shelf.

**Claim Number 12**

The turntable of Claim Number 10, wherein said rim portion is formed from pre-formed segments of laminated wood which segments are mountable onto said shelf.

**Claim Number 13**

The turntable of Claim Number 12, wherein said segments are compatibly sized to be efficiently packaged for shipment and for storage.

**Claim Number 14**

The turntable of Claim Number 12, wherein said segments are mountable to the shelf using a number of dowels that fit into aligned holes on the shelf and the rim portion and which fasten the rim portion to the shelf.

**Claim Number 15**

The turntable of Claim Number 10, wherein said shelf has a kidney shape and where said rim portion circumferentially conforms to the kidney shape.

**Claim Number 16**

The turntable of Claim Number 12, wherein said rim portion is mountable to the shelf using screw fasteners.

**Claim Number 17**

The turntable of Claim Number 12, wherein said rim portion is mountable to the shelf using glue.

**Claim Number 18**

A lazy susan apparatus with one or more shelf(s) for the storage of a plurality of items, with a supporting mechanism for the rotatable retention of the shelf within a cabinet or on a surface, the improvement therein comprising:

5        A shelf with a rim portion where said rim portion is fabricated from a pre-formed wood laminate and is mountable onto the shelf.

**Claim Number 19**

The lazy susan apparatus of Claim Number 18, where said rim portion is made from pre-formed segments of wood laminate.

**Claim Number 20**

The lazy susan apparatus of Claim Number 18, where said shelf is made from a wood laminate.

**Claim Number 21**

The lazy susan apparatus of Claim Number 19, wherein said segments are mountable to the shelf using a number of dowels that fit into aligned holes on the shelf and the rim portion and which fasten the rim portion to the shelf.

**Claim Number 22**

The lazy susan apparatus of Claim 19, wherein said segments are compatibly sized to be efficiently packaged for shipment and for storage.

**Claim Number 23**

The lazy susan apparatus of Claim Number 18, wherein said shelf has a kidney shape and where said rim portion circumferentially conforms to the kidney shape.

**Claim Number 24**

The lazy susan apparatus of Claim Number 19, where said shelf and said rim portion and said segments are configured for a pie-cut application.

**Claim Number 25**

A turntable for the storage of items, comprising:

A shelf suitable for holding a plurality of items thereon, said shelf  
including a rim portion generally disposed circumferentially thereon,  
where said rim portion is comprised of segments of pre-formed laminated  
wood, said segments being mountable onto said shelf and being  
compatibly sized to be efficiently packaged for shipment and for storage;  
and,

A supporting means for rotatably supporting said shelf in an application.

Claim 26

The turntable of Claim Number 25, where said shelf is made from a wood laminate.

**Claim 27**

The turntable of Claim Number 25, where said segments are of approximate equal lengths.

**Claim 28**

The turntable of Claim Number 25 where said shelf is formed in a kidney shape and said rim portion circumferentially conforms to said kidney shape.

**Claim 29**

A turntable for the storage of items, comprising:

A shelf suitable for holding a plurality of items thereon, said shelf

including a rim portion generally disposed circumferentially thereon;

Segments of pre-formed laminated wood comprising the rim portion, said

segments being mountable onto said shelf and being compatibly sized to

be efficiently packaged for shipment and for storage;

A supporting means for rotatably supporting said shelf in an application;

and,

Where said segments may be of non-uniform height.

5

10

**Claim 30**

The turntable of Claim Number 29, where said shelf is made of a wood laminate.
